Community in a Box

A one-month deployment · Pure Expertz · Block by Block AI Safety and Security Alliance

You get a working community — your brand, your people, your rules — live in thirty days. Not a platform license and a wish of luck. We build it with you, on systems you own, and hand it over running.

WHO THIS IS FOR

Organizations, small teams, associations, chambers, faith and civic groups, and property owners who already have people — and no good place to put them. If your members, tenants, staff or clients are scattered across a group chat, an email list and nothing else, this is the fix.

This is not a one-to-one coaching product. It is a deployment for a group.

THE COMMITMENT WE ASK OF YOU

Two hours a week from you, to save ten to fifteen. That is the whole trade. Two hours of your attention during the build month. What comes back is the ten to fifteen hours a week currently going into chasing, repeating, forwarding and following up.

WHAT THE MONTH LOOKS LIKE

Week 1	**Map it.** Who your people are, what they actually need from you, and where the time is leaking today. We write it down. Most of the value shows up here and it surprises people.
Week 2	**Build it.** The community space itself — your brand, your structure, your access levels. Plus the one workflow that removes your biggest weekly burden.
Week 3	**Automate it.** Onboarding, follow-up, reminders and reporting run without you. This is where the ten to fifteen hours come back.
Week 4	**Hand it over.** Your people trained, guardrails written down, a named owner for each one, and a 30-day plan you run yourself.

WHAT YOU OWN AT THE END

- The community, on your brand — not ours
- The workflows and automations, documented
- A written AI use policy: what is allowed, what is not, who is accountable
- Your team trained to run it without calling us
- Access to the Trusted Service Provider network for the trades and services your people need

WHAT IT COSTS

To begin	**$2,000 deposit** starts the one-month deployment and books the build window.

Ongoing	Community operating support from **$495 per month** once you are live. Cancel any time — if it is not earning its place, it should not be there.
Hub Operating License	**$15,995** — for organizations that want to run this as their own offering under Alliance standards. Discussed separately.

Final scope and price are confirmed in writing before any work begins. Nothing is charged beyond the deposit until you accept the scope.

WHY US

I am a licensed independent WSI AI Consultant and a Board Certified Protection Professional through ASIS International. We build on the standards of the **Block by Block AI Safety and Security Alliance** — which means governance is not an afterthought bolted on at the end. It is week one.

We are system agnostic. If you already run on something, we work with it rather than replace it.

NEXT STEP

A twenty-five minute conversation. No proposal deck, no pitch — I want to hear what is actually breaking. If we are not the right answer for you, I will say so on that call.
